DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 2 January 2008 have been fully considered but they are not persuasive.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 6-13 rejected under 35 U.S.C. 103(a) as being unpatentable over JP-11/152260.

Applicant's Arguments

JP '260 describes a method for preparing an amideamine oxide using an amideamine as a starting material. This reaction involves oxidation of an amideamine with hydrogen peroxide in the presence of a specific phosphoric acid or a salt thereof:

In JP '260, the oxidation reaction is carried out at 40 to 100°C and preferably 60 to 100°C. JP '260 discloses in paragraph [0014] that when the temperature exceeds 100°C, coloring is insufficiently prevented by the organic phosphonic acid or a salt thereof. Further, the effect of prevention of degradation of the color and the odor by the organic phosphonic acid compound is exerted in the reaction products different from that in JP '260.

In view of the foregoing, Applicants respectfully submit that the present claims are not obvious over JP '260 and thus the rejection should be withdrawn.

Examiner's Response

While the final compound produced in the process disclosed in JP260 is an amideamine oxide, the reactant used in the production of this compound is a fatty amide. As stated in the previous office action, sections [0001] and [0009] specifically disclose the amidation process producing the fatty amide. Also it should be noted the claims read on "carboxylic amide and derivatives" which included the amide amine oxide of JP'260.

The transitional term "comprising" is considered synonymous with "including," "containing," or "characterized by," and is considered inclusive or open-ended and does not exclude additional, unrecited elements or method steps. See, e.g., *Mars Inc. v. H.J. Heinz Co.*, 377 F.3d 1369, 1376, 71 USPQ2d 1837, 1843 (Fed. Cir. 2004).

Therefore applicant's arguments regarding the oxidation of the fatty amide are moot because the preparation of the carboxylic amide derivative includes the presence of phosphonic acid and results in a compound with good colouring.

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., temperature of amidation) are not recited in the rejected claim(s). Although the claims are

interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Conclusion

2. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Allowable Subject Matter

4. Claims 14-21 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
